Mr. Joe Hertzler
Hertzler and George
P. O. Box 457
Williamsburg, Virginia 23187

Dear Joe,

For the entire Session of Campbell Memorial Church, I would like to extend my sincere appreciation for the exceptional job you, Phillip Merritt, and Mitchell Foos did in briefing us on your completed Landscape Master Plan. The presentation was well received by all and clearly demonstrates the high quality of H&G work. The Plan provides us with an excellent roadmap for future actions to improve the church's public image and functionality. Its contents reflect a high level of innovative professional thought.

I am attaching a letter of endorsement for your firm which I hope you can use in any of your publications. It further cites our feelings about your work for Campbell Church.

We look forward to the forthcoming additional briefing you will provide to our congregation and local neighbors.

Our many thanks for a job well done.

Sincerely,

Clay Macaulay

To whom it may concern:

For anyone having a need similar to ours for a long range architectural master plan for their property, we highly recommend the firm of Hertzler and George (H&G). As a prominent local public institution, our facilities have grown over a period of almost 200 years with numerous additions to the main structure, but with the absence of a clear direction for the look and feel of our outside image. After deciding that public perception of the grounds warranted closer attention, we started looking for professional help. We did not want to continue to make landscaping decisions and expenditures in an unstructured fashion.

Early decisions relating to selection criteria for a Request for Proposal focused on a potential firm's ability to assign staff members who were both Certified Arborists and Landscape architects, provide a turnkey operation (from design through construction), to have demonstrated design innovativeness, and, to have experience with design and construction of both hardscaping and softscaping, and preservation of the historic nature of the structures.

H&G completed the Master Plan in an expeditious fashion. They have worked with a diverse (and sometimes highly opinionated) committee of our members. They have worked with us in great harmony and cooperation. They have incorporated committee concerns judiciously, creatively and in good humor. We now have a conceptual plan for the future that will allow us to make more informed and fiscally responsible decisions and to look forward to implementation of the Plan.
